Chennai, Tamil Nadu

Web Developer

SUMMARY

Dedicated and self-driven web developer with expertise in creating responsive and interactive websites using HTML, CSS, JavaScript, React, and Bootstrap. Skilled in designing user-friendly interfaces and integrating APIs with CRUD operations to build functional and modern web applications. Though my professional experience lies in telesales, I have a strong passion for technology and a proven ability to quickly learn and apply technical skills. Committed to contributing innovative solutions and collaborating on impactful projects in the tech industry.

PROJECTS

IoT based Smart Water Bottle - MCA Final Year Project

- This innovative solution harnesses the power of PHP and MySQL to create a user friendly web interface, where daily water intake is meticulously logged and monitored.
- The project's crowning achievement is the real-time display of remaining water levels directly on the water bottle's exterior, courtesy of an LCD screen, making staying hydrated not only convenient but also a captivating tech experience."

Modern E-Commerce Solution

- A fully functional e-commerce app with product filters, a shopping cart, and user authentication for a seamless shopping experience.

WeatherWise: Real-Time Weather App

- An intuitive weather app with live forecasts and animated backgrounds that adapt to the current weather conditions.

TaskFlow: Intelligent To-Do List

- A productivity tool with drag-and-drop task organization, CRUD functionality, and real-time sync for managing daily tasks.
